Used for feed for Ducks and for future  
to ensure scraps removed / dug in to a  
depth of 300mm so as to avoid 'Puy'  
nuisance & odour - prefer disposal through  
normal channels.

Further advised prefer enclosure in which  
ducks are fed and thus easy management  
of removal of scraps ~~soon~~ after ducks have  
been fed.

Ensure enclosure cleaned and to  
prevent food source for possible vermin and  
odour.

HUGH requested to be contacted as he would  
attempt to gain compliance with Notice.  
One for compliance 17.9.02

HUGH was advised BCC would contact  
him with <sup>proposed</sup> actions Council was going to  
undertake - Requested extension if some  
progress was made. I advised consideration  
but BCC was serious in obtaining a LONG  
TERM solution to this continuing problem.
