# “Annastacia Palaszczyk government MURDERS poodle lady”

**Logan Hospital will intentionally kill you and set your partner up for murder charges if they can.** Queensland Government Health Department. Labor government management.

This is what happened to Geraldine Foon Fong Robertson and then Trevor Croll at Logan Hospital - The criminal incompetence, criminal negligence, and criminal omission is astronomical. This petition is rather long and detailed.

### Background:

Trevor Croll was investigated by the Senior Constable Lee URMSTON of the Jimboomba Police Station for the murder of Geraldine Robertson. Neighbours and others were interviewed as part of this investigation. Trevor made representations to Mr Joseph (Joe) Kelly MP member for Greenslopes who did not care and could not care, was pathetically indifferent that Geraldine had been murdered by the Logan Hospital.

### QCAT Senior Member

**Endicott said " ... caused by twisting injury or head injury ... CT (Trevor Croll) was aware of some facts that may be relevant to the injury ... had been reported to the police".**

[See Clare Endicott Article page3.]

Geraldine Robertson had been having episodes that she was told were panic attacks! The hospital file contains details of her having had these transient ischemic accidents (TIA)- micro strokes. Hospital records show Geraldine had atrial fibrillation (heart arrhythmia) and hypertension (high blood pressure) both indicators of blood clotting resulting in strokes. The hospital never prescribed blood thinners to protect her from the likelihood of heart attacks and strokes caused by her blood clotting. They failed to prescribe as they should have done. This is gross negligence, at least, if not the more serious deliberate action.

Based on these bogus panic attacks the hospital went looking for an

## STOP PRESS

The Annastacia Palaszczyk government has tried to prevent our telling you of this corruption of the Annastacia Palaszczyk labor government MURDER of Geraldine, by locking up Trevor Croll because he distributed this information in a flyer he placed on cars and in Letterboxes. They used the Mental Health Act, FIVE ARMED and THREATENING police [& Qld police are corrupt] and two "mental health workers" to come and cart Trevor Croll away on the pretence that he is "delusional". This demonstrates the corruption within the Annastacia Palaszczyk labor government. They had to silence Trevor.

artifice they could claim would cause "panic attacks" and pronounced her husband Trevor Croll as the cause, and

Annastacia Palaszczyk

advised that to Geraldine. Trevor's relationship with his wife deteriorated as he was accused and abused by Geraldine Robertson in the mistaken belief that Trevor Croll was the cause of all her

Continued page 2

## Editorial:

All of the last eleven [11] charges that Queensland police have laid against me, over the last 12 years, have been concluded in my favour. That alone suggests that the Queensland police are corrupt and have been targeting me. [I have not been charged by Qld police since Easter Monday, 2010. [However, they did continue with four charges that were pending at that time, against me until January, 2014, when they just dropped them; all four charges.]

The purpose of HaigReport is to strike at corruption in Queensland and Australia. How can we fight corruption? We have only one vote. The High Court has recognized that as the Australian Constitution has provision for democratic elections, then there exist a freedom of communication about government and political matters, so the population knows the facts on which to base their votes. The sunlight of the truth can sterilize the corrupt parasites.

Police rely upon defendants having lawyers. Defending clients is not the main aim of lawyers. Police, magistrates, judges and lawyers [and QCAT 'decision makers'] are part of the Queensland corruption 'industry'. A few higher court judges are not corrupt. You can be lucky.

I, without a lawyer, had a unanimous major win in the Qld Court of Appeal on 20th July, 2010, when the Court described a hearing of a charge against me in the Brisbane Magistrates Court [before magistrate Walter Harvey Ehrich] as "egregious". I have no reticence in calling magistrate Walter Harvey Ehrich, CORRUPT. I have the irrefutable evidence that Qld police are corrupt, including their having committed armed robberies, assaults and batteries, but to show even greater corruption in the upper echelons of the Qld police, Qld police will not investigate these crimes.

When the Qld public sector parasites know that I have been targeted by Qld police, they too are happy to act corruptly. I do not have space in this editorial to detail all this evidence but it is available on my associated website, HaigReport.com/. If you wish to delve further, I suggest you google with the prefix <site:HaigReport.com[space] then search terms> {but without the <> or [] or contents of []}.

This newspaper, HaigReport [ISSN: 1834-6294] is distributed by residential letterbox deliveries. We can target areas, such as suburbs or electorates anywhere in Australia, depending on the content and purpose of the particular edition of HaigReport [ISSN: 1834-6294]. We contract with printers and firms that handle letterbox distributions. I compose the copy that is sent to the printer. That copy will also be published online on HaigReport.com/, which is stored on a Server overseas to Australia.

The way to effect change in Australia, as shown in the article headed "*Letterbox distribution of written TRUTH WORKS*", on Page 3 of this edition, is by letterbox distribution of content exposing corruption by elected representatives of those people who receive that targetted letterbox delivery. Complacent sitting members, MP and councillors, with substantial majorities have been defeated by this method. When elected members see they could be defeated, their minds are concentrated.

If you individually or as a member of a group, have a gripe against a council or government in Australia, HaigReport [ISSN: 1834-6294] can handle the campaign targeting the most effective letterboxes where you can have the greatest effect. As printing and distribution costs money, HaigReport [ISSN: 1834-6294] will conduct the campaign provided the articles are provided as well as advertising that is paid such as to cover the cost. Often, groups whose members have been adversely affected by council or government decisions, will have members who are in business. They could have advertisements included whose cost will cover the cost of printing and distribution, and they would find that the cost would be very competitive.

# Bribes to rezoning consultants, & Greed of corrupt property developers & local councils cause over-priced real estate and impossible costs for 1<sup>st</sup> home buyers, leading to economic recession

Ask your candidate for the next election if he will support an inquiry into the high cost of house and land packages.

Most People are not aware that people paying off large mortgages create unemployment. Most of their money goes to banks leaving very little being spent in the local community. Reduced demand for local products and services means less employment. The great depression of the 1930s followed a similar surge in over priced assets - houses and shares. The conditions of another great depression are upon us now. Greedy banks cause recession. When people can no longer afford high repayments banks do a fire sale recovery causing a crash and people with debt lose everything. High repayments reduce employment and the system becomes unstable. So far low interest rates have kept the great depression at bay, but slowly and steadily the conditions for the next great depression increment us closer and closer.

Do you realise when people purchase a new home and land package they are paying off:-

## Palaszcuk government MURDERS poodle lady Continued from page 1.

problems. They thought that they had another one of these "ALL MEN ARE DOMESTICALLY VIOLENT" narratives. It finally happened, on the 30th July 2016, Trevor Croll arrived back from a trip to Victoria to find Geraldine crippled on her bed and called the ambulance for her. Based

1. the actual work in preparing the land and building the house;
2. the additional red tape application fees;
3. the engineering and compliance reports required to satisfy red tape demands of government;
4. the bribes paid to "consultants" who negotiated the zoning changes for the developer;
5. Government money grabs, eg infrastructure charges \$60,000 per new home;
6. Developer profits for doing the work, \$60,000 fees paid become \$90,000+ added to the cost of producing the house and land package, bribes plus profit margins, red tape plus profit margins.

Check it for yourself – what does it cost to produce a suburban building house site?

What does it really cost to produce a building block? The land banking / developer paid less than \$2000 per building block for Yarrabilba land. Asphalt costs from \$15 to \$18 per square meter to lay in

volume. For each house block this is about \$1000. The road base costs about \$2000 per building block. The edging about \$2000, the water \$500, the sewage \$3000, underground electricity \$500, communication cables \$500. The actual outlays and materials required to produce a house block costs \$11,500.00.

### Now comes the rip off:-

Then we have to add the costs of surveys, plans, Planning consultants, application fees and charges, all the red tape and charges bring the land package cost to \$60,000. But the land sells in the range of \$160,000 to \$350,000. On this basis there must be a bribe or rip off excess profit of about \$100,000.

### The horse-thieves take about \$100,000.00 on every house block.

The pricing structure indicates significant criminal activity. Bribes and favours for zoning changes. We need to know what is really happening to drive the price of homes from 2.5 times the average wage ten years ago to 6+ times the average wage now.

on the diagnosis of the Logan Hospital medical file without blood thinners Geraldine would have had this stroke. That Geraldine was not prescribed blood thinners was pure negligence making it foreseeable that Geraldine would die from a major stroke. Thus Logan Hospital is legally and financially liable for the death of Geraldine Robertson. The Logan Hospital, by their negligence, [or intention?] deliberately set Geraldine up to die from a massive stroke. But it gets even worse! A dead person can not sue for damages. Logan Hospital has a fiduciary duty and that hospital has

# Clare Endicott, QCAT Senior Member – Human Rights, is corrupt

QCAT's Clare Endicott

My [Russell Mathews'] personal experience [16<sup>th</sup> April, 1992] with this parasite's dishonesty amounting to CRIMINAL perversion of the course of justice, has been supported by the Qld's Court of Appeal decision in *Maher v Adult Guardian & Anor* [2011] QCA 225 (11/3174) Chesterman and White JJA and Philippides J 9 September 2011. In that case the Court of Appeal found that Clare Endicott had engaged in apprehended bias and QCAT had engaged in secrecy surrounding her sitting on the biased appeal before Endicott. That was more than five years ago, and Endicott is still there, in the QCAT portion of the Queensland corruption sewer.

In 1990 I was set up by bogus written complaints by feminazis to the Human Rights and Equal Opportunities Commission [HREOC] then under the direction of Quentin Bryce. Clare Endicott, was the Town Agent for HREOC.

It went to a hearing in 1991, before another corrupt but dumb turkey Kevin O'Connor. HREOC prejudiced the hearing by giving O'Connor secretly, without my knowledge and without my seeing it, a "black vinyl folder" of what they called "background information" which was just fabricated allegations of wrong doing by me. At the time I would have realized that that was unfair to me. When I was studying Admin Law in 1994, at The University of Qld, for my LLB, I discovered that that

secret written prejudicial material, made the decision of O'Connor [which of course was adverse to me – their pre-determined result] was *ultra vires* and *void ab initio* [ie totally unenforceable, as if it did not exist].

I appealed that decision of O'Connor to the Federal Court. It was set to be heard starting Wednesday 22nd April, 1992. Friday 17<sup>th</sup> April, 1992 was good Friday. As a result, HREOC had to serve me with their court documents on Thursday 16<sup>th</sup> April, 1992.

The documents were mainly the affidavit of a John Joseph Armstrong who as "counsel assisting" O'Connor was a party to the corruption before O'Connor. The affidavit was three pages but there were about 1,000 pages of annexures to the affidavit. The "black vinyl folder" which he called "background information" was Exhibit JJA3.

Had I been able to read the affidavit and JJA3, I would have seen how HREOC had prejudiced the hearing coram O'Connor. I would have brought that to the attention of Spender J. [another corrupt parasite] at the beginning of the hearing.

I should have had all of the four days of Easter and the Tuesday to scrutinize that affidavit and been able to read the precise contents of JJA3 including the bogus false allegations about me. Spender would have had no option but to call the hearing coram O'Connor as *ultra vires* and I would have won. They did not wish that to occur.

Clare Endicott rang me on the Thursday, 16<sup>th</sup> April, 1992, with the excuse that because they were having trouble photocopying they would not be able to serve me before 5pm that day. I said I was prepared to remain late, [I lived on the premises]. She was silent for a while then spirited out, that I would not be served that day but on Tuesday next, the day before the hearing was to commence. Clare Endicott

later lied in writing the reason that I was not served on that day. The reason she gave, as is typical for a feminazi whore for law, was that I had purported that it was inconvenient for me to be served on the Thursday. Just consider the logic of that. I lodged the appeal. I really wanted to know all I could of what they had done, and what their case was.

The reason that these feminazi parasites wanted to serve me late, was to prevent my reading it to discover that the decision maker Kevin Patrick O'Connon was given the fictitious fabricated complaints against me, when I did not know of them, and that he made his decision based upon them. That was the FEMINAZI WHORE FOR LAW SET-UP. There were over 1,000 pages in all the attachments to the affidavit. By legal precedence, the giving to a decision maker of prejudicial "evidence" in other

than verbal, makes his decision *void ab initio* [void and unenforcible from the beginning and nothing can resurrect it]. Although, at that time I did not know of that legal precedence, I would have brought it to the attention of the judge, had I known of it. On the last or second last day of the hearing, I did realize that O'Connor had documents presented to him, when those prejudicial documents were unknown to me, and I mentioned it to Spender, who hesitated for a short time, but then continued.

Importantly, Clare Endicott made another major lie to me when she phoned me, and that was that I would not be disadvantaged, as there was nothing in the file that was unknown to me. That was also a mammoth lie.

If you have this parasite, this feminazi whore for law, Clare Endicott, as a decision maker in your matter before QCAT, you can expect that the establishment party will win, and you will lose.

## Letterbox distribution of written TRUTH WORKS

When LOCAL COUNCIL and GOVERNMENT 'officials' target you, you have a problem and it's all yours, When you tell the community about your problem and how those "officials" could just as readily target each member of the community, individually, the problem takes on a whole new dimension.

When you want the bullying over it does not stop. When the community wants the bullying over then it stops.

If officials are bullying you, then their boss, and their boss's boss wants that bullying or at least permits that bullying.

The upper echelon of Public sector parasites, are bullies and tyrants. When they know that enough members of the community know of that tyrant, that tyrant wants to silence the publicity. Those outed tyrants know that their fellow senior tyrants will avoid dealing with them as they are a liability to their fellow tyrannical bullies, who want their bullying and fraudulent conduct kept secret. Sometimes you have to fight for justice. Those senior tyrants then bully the officials who picked on the wrong people.

There is a huge amount of bullying from Government and Councils.

7. Councils sending out inspectors to collect money for unregistered pets and other excuses for revenue raising, \$28,000 for permission to subdivide, \$38,000 for permission to build a home on your land, \$75,000 for permission to build an office, \$1million for a 5000m2 commercial building, \$10,000 to build a small dam. Massive amounts of what should be unnecessary in many cases red tape and engineers reports.
8. Needing permission to remove dangerous trees and the application fees,
9. Needing permission to add more than 2 truck

loads of fill to your property and \$10,000 of red tape and application fees.

10. Police falsely prosecuting or putting it on that you have to pay them for doing their job,
11. Council officers come with compliance notices which are unreasonable and unfair.
12. Police helping criminals rob from small businesses while threatening them.

### Strategy 1 Get the bigger tyrant to do it for you.

This technique requires documenting your problem ensuring you have got the facts covered then distributing that information to the voters. Voters are the biggest tyrants as voters can sack the people who allow their bullies to bully. A slightly lower tyrant is the bully's boss's boss. The Bully's Boss's Boss is the one who get the blame for what the bully is doing. The bigger tyrant then sorts things out for you with great haste.

EX-labor member for Albert, of state parliament Margaret Keech is a perfect example of the effectiveness of this approach with voters.

Margaret Keech

The Queensland State electorate of Albert was won in 2001 by Labor's Margaret Keech, with a 12.9% swing at an election where Labor recorded its best ever result on the Gold Coast. Keech increased her majority in 2004 and retained her vote in 2006 before her margin was halved at Anna Bligh's first

Continued page 4

# “Dog in the Manger” Logan Mayor Luke Smith prevents rural residents' access to stormwater so costing Logan Ratepayers

Logan Mayor Luke Smith is so mean spirited he will not allow people on rural properties to access the water running away beside the roads past their own land, to fill their dams. Trevor Croll dug a drain from the roadside drain to his dam only to have Logan City Council come along and fill it in and pack concrete blocks into it making it so much more difficult to repair.

There was a drain to the road drain that had been filled in. This is a country road where there is no room for pedestrians as that room is taken up with an unnecessarily deep and large drain. Each year the Council has cleaned it making it larger till it is ridiculously large for the amount of water it carries. As the total capacity of all tanks and dams on property increases, there is

less stormwater to flow downstream so causing flooding, and the cost and fatalities of flooding.

In fact, encouragement of an increased number of rainwater tanks and stormwater dams on rural properties not only mitigates flooding but also improves drought proofing of regions and states downstream.

With more rainwater tanks and especially many smaller agricultural and pastoral dams upstream, mostly on private land, there will be a reduced need for larger dams downstream, which dams would be at a substantial cost to taxpayers.

Despite the mitigation of floods benefit of an increased number of agricultural dams, the Logan City Council, has, in their 'wisdom' decided to charge ratepayers \$10,000 for the right to construct such a dam. It really is a matter of the little minds of public sector parasites deciding they have the power to bully ratepayers.

It seems when people are elected they become avaricious idiots.

Trevor complained to Logan City Council.

So, Luke Smith sends out another

public sector parasite Kevin Shepherd. He said it is okay to drain stormwater into the roadside drain, but not to take stormwater from the roadside drain.

The reader can see what a bludger this parasite is from his card. He crossed out his mobile # to save having to answer calls. That would save him much effort and reduce the efficiency of Logan City Council.

## Letterbox distribution of written TRUTH WORKS continued from page 3

election as Premier in 2009, but Keech was still comfortably ahead. Keech supported RSPCA and their evil campaign against Geraldine Robertson. Margaret Keech would not help Geraldine Robertson or do anything to stop the viscous RSPCA campaign against Geraldine.

A flyer on this was letterbox distributed in her electorate, detailing the true nature of this parasite in the campaign for the 2012 state election. Keech was so cocky that she would win, that she was telling constituents to see her after the election.

Keech was defeated by an 18.4% swing in 2012, one of the largest swings in the state. Her primary vote dropped 25% and her margin dropped 18.4%. Margaret Keech got the sack for supporting the RSPCA bullies. This Labor Government should all be sacked for supporting RSPCA bullies.

The foolish EX-Councillor Don Petersen for division 4. of the Logan City Council, spoke at meetings telling of what he was going to do to that Chinese poodle woman; Geraldine Fooi Fong Robertson. A flyer distributed by Letterbox deliveries, during the last council elections campaign for the

19<sup>th</sup> March, 2016, saw him off. Sometimes the only thing left to do is punish. By punishing, you give yourself insurance against being bullied again. Bullies tend to pick on those who cannot fight back. Show you can fight back, not by telling them, but by doing it to them.

[Check his buttons. Is he wearing a woman's blouse?]

Don Petersen

## Palaszczuk government MURDERS poodle lady Contd from page 2

breached their fiduciary duty to Geraldine by knowing she was in need of blood thinners and not prescribing them and not properly advising Geraldine of her condition and what it meant. Geraldine could claim \$millions from Logan Hospital. In hospital Geraldine Robertson could communicate by blinking. She was initially unable to speak or make any noises. After about 4 days Geraldine had begun to vocalise and move her legs which is the beginning of recovery. This was seen by Trevor and reported to Trevor by other patients. Trevor was told the stroke hit her in her brain stem and thus her brain couldn't communicate with her body. Brain neurons are known to rewire themselves after a stroke so there is always a good chance of a good recovery.

Dr Sze Yan Sallyanne Chan, a member of Geraldine Robertson's treating team at Logan Hospital had suggested to Trevor that Geraldine would not recover but Trevor wanted her to be given a chance to recover. Logan hospital and the Annastacia Palaszczuk government did not. Trevor did not agree to palliative care. Geraldine Robertson had given Trevor Croll an enduring power of attorney so he could act for her and make decisions for her if she became disabled.

This is when it got much worse for the Labor Government and Logan Hospital. It seems that Dr Sze Yan Sallyanne Chan decided to kill Geraldine by drugging her to

the eye balls thus disabling any chance of recovery. This killed her. That it was deliberate is what the actions and evidence suggest. Logan hospital did not want Geraldine to recover.

Dr Sze Yan Sallyanne Chan, a member of Geraldine Robertson's treating team at Logan Hospital, swore under oath that the information she provided to QCAT was true to her knowledge and said Dr David Roberts (General Physician) had approached her to fill in a form "Report by medical and related health professionals - Guardianship and Administration Act 2000." In this form section 5.1 Dr Chan states "Patient is unable to understand, retain, or communicate personal health care decisions due to disability from the stroke". A stroke she later perjured was caused by her head being twisted damaging her brain stem causing a blood clot and stroke.

In Section 4.1 of that form Dr Chan said Geraldine Robertson had previous presentations for transient ischaemic attack (TIA) also known as micro stroke. Geraldine was not advised of this. When people get these they are put on blood thinners to prevent a fatal outcome. Geraldine Robertson was never prescribed blood thinners or properly advised of her condition.

For Trevor's enduring power of attorney to be revoked it had to be shown that Trevor would not act in Geraldine's best interests.

Continued page 5

Dr Chan lied to QCAT that Geraldine Robertson's head had been twisted by her husband, damaging her brainstem and causing a clot. Dr Chan said her husband had been out of town for a few days, indicating the violent twisting of Geraldine Robertson's head had occurred, then her husband left, then he came back and called an ambulance and that he knew how to do these things and what he had done. Dr Chan also verbalised Trevor Croll throughout her report saying he said things that he did not say. The QCAT hearing happened without Trevor's knowledge and was a dirty underhanded malicious attack on Trevor and Geraldine. It is a denial of due process aka denial of natural Justice and procedural fairness.

Dr Chan's mistake was assuming Trevor had been "out of town for a few days". In fabricating their story of lies they made a mistake. Trevor had left, driving to Victoria on Friday morning the 22nd July 2016 and had arrived back and discovered Geraldine in her disabled state on Saturday evening on the 30th July 2016. That is eight days later.

It was proven Trevor Croll could not have murdered Geraldine Robertson. If the lies told to QCAT were believed there is a murderer out there who goes around to old ladies homes and twists their necks damaging their brain stem with subsequent clotting then leaves them crippled to die slowly. If you smell death in your street call the Police, there is another murdered old lady rotting in her home.

To put Geraldine Robertson down the hospital needed her husband's Power of attorney to be revoked and lied that Trevor "will not act in her best interests". Trevor had obtained an enduring power of attorney four years previously due to Magistrate HALL assisting RSPCA by declaring Geraldine mentally unfit while she was personally and successfully prosecuting RSPCA for stealing, lying in court, and fabricating evidence.

There had to be a 'justification' before the enduring power of attorney given by Geraldine Robertson to her husband could be revoked by QCAT.

'Lucky' or by design this application was decided [in secret, and without any personal appearances] by corrupt femi-nazi, Clare Endicott. See page 3 article, "Clare Endicott, QCAT Senior Member – Human Rights, is corrupt".

Senior Member Endicott made the decision to appoint the Adult Guardian (Robert Davie from OPG Robert.Davie@publicguardian.qld.gov.au and 07 3884 6664) who also is responsible for Geraldine going into palliative care and Public Trustee for Geraldine Robertson. Rebecca McKimmie Rebecca.McKimmie@health.qld.gov.au urgently sought Robert Davie to approve palliative care.

Geraldine Robertson was put down with Aspirin 100mg, Paracetamol 1 gram, piptaz 4.5 gram, amlodupine 5 mg, nilstnt

1ml, amlodipino 10mg and probably other drugs closer to the time of her death within about 7 days. These drugs turned her brain off so they could kill her body. Geraldine died on the 23 August 2016. The Logan Hospital denied her her chance to recover and be alive.

Trevor Croll had been paying Geraldine Robertson's Private Health Insurance for the previous six years. The Logan Hospital refused to apply this private health insurance to Geraldine's condition and possible recovery. Trevor wasted \$9,000 + on Geraldine's private health insurance.

Geraldine Robertson was misled into blaming her husband for her health problems which she called panic attacks. This blaming caused domestic stress for her and aggravated her tendency to anxiety and high blood pressure.

Geraldine was denied a proper diagnosis and deliberately not prescribed medication recommended for people having TIAs that would save her life. And I am still waiting to read the Coroners report on this. Why is the Coroner taking so long to report on this? Trevor says he has come to expect a cover up based on his previous experience with Queensland Labor Governments.

When Geraldine had her stroke the hospital went to QCAT with lies to get control with the adult guardian (Geraldine comes from a very, very, very, wealthy Malaysian Chinese family) and was then put down / murdered

by that hospital. Her husband was set up for a murder charge which the hospital expected would have put him in prison on remand and then sentenced to prison for 20 years on their lies.

Trevor was just very lucky, if he had been in Brisbane at the time he would have been in prison on remand and then convicted for murder on the lies of a doctor.

But this is a crime that will never be remedied. The Queensland Courts protect false witnesses who lie for the prosecution and they are never prosecuted. Every case for damages are automatically dismissed on the basis that it is against public policy to allow cases like that to continue. If people are prosecuted for perjuring themselves to cause another citizen harm the Courts fear that people will not come forward to help the courts with their evidence.

It is for this reason that as many people as possible should know about this. This knowledge may protect others in their future. I am telling you this because I believe it is in the public interest for you to know how crooked our hospitals and courts are.

Geraldine survived the theft of her poodles by RSPCA when the Chinese were paying up to \$200,000 in their fad for poodles. Geraldine survived death threats, harassment, assault, massive defamation in media and internet, cruel horrific nasty letters. RSPCA lied in court and the courts

conspired with RSPCA against her. Then Geraldine was murdered by deliberate hospital 'negligence' followed by deliberate acts to kill her.

It is clear that Trevor could not have murdered Geraldine, he was in Victoria at the time. The words in the medical file make it very clear that that is what happened. It is obvious that those words in the medical file were fabricated for this wrong of having Trevor prosecuted for Geraldine's murder. A serious wrong has been done.

RSPCA seized Geraldine's poodles on 8 January 2008 and then on 22 February 2008 came again and seized all her evidence including her microchip list of poodles, her pedigree registered documentation, her export vet checks and vaccinations on 13 puppies due for export to Singapore the very next day, her evidence of her kennel licence, cash, jewellery, privileged documents being communications with her solicitors. In court the dogs RSPCA purported to have been Geraldine's Geraldine clearly stated most were not hers. Geraldine's dogs, the red and brown breeders, were worth up to \$200,000 each to Chinese who at the time had a fad on these poodles.

The corrupt media with RSPCA then mounted a campaign of lies against Geraldine Robertson including photos of dogs not Geraldine's. You should not believe what you see and hear on Television. It is only "a good story" for them.

## **Waterford Boarding Kennel and Cattery**

**The Waterford Boarding Kennel and Cattery, at 17 Buccan Rd, Buccan QLD 4207, is a modern cool and comfortable kennel and cattery with spacious areas for your dog or cat to exercise while boarding. The charge is reasonable at \$20 per day, including the first and last day.**

**If you are interested, please contact Trevor on 0434633863**

# BUSINESS and RESIDENTIAL OPPORTUNITY

The owner is offering a long term lease on an existing kennel business and home attached. The property has, attached to the land, a permanent "fettered right" that was previously issued under an earlier amendment to the Stock Act. The fettered right is permanent and is for a kennel for 75 dogs, unlimited cats and unlimited pups under three months of age. No further licence is required. The present kennel building is better block and steel, with 20 large kennels with large attached enclosed areas.

If you are interested, please contact me on my PHP contact form at <http://HaigReport.com/eml.html> or just google Contact HaigReport.com/.

Why it works. I first produced my own tabloid newspapers when I was an Accountant and Registered Tax Agent in Townsville in the 1980s, to advertise my accounting and tax services, especially at tax time. I included in the paper, a coupon which could be presented to my firm for a cash discount for a tax return preparation. It was very effective and cost efficient. Those tabloid newspapers were a reasonable amount of work for myself as I produced all the articles including photos. For all of those newspapers, I had various newspaper printers do the type setting. This copy of HaigReport is the first tabloid newspaper for which I have done all of the typesetting. I save on work as I do not write all of the articles.

If you wish to have any message, commercial or political, disseminated anywhere in Australia, you may find that HaigReport is the vehicle for you. If you think it may, contact me on my PHP contact form at <http://HaigReport.com/eml.html> or just google Contact HaigReport.com/.

Because I can use printers anywhere in Australia, send them the newspaper copy by email, pay via the internet, and have the printed copies delivered to letterboxes in almost all areas of Australia, HaigReport [ISSN: 1834-6294] has the ultimate in flexibility.

The cost can be very competitive as we are offering "Introductory Deals". If you wish to organize your own letterbox distributors, the cost can be further reduced. You may organize to give a sporting or scout "club" a donation for distributing your copies.

If you are interested, please contact me on my PHP contact form at <http://HaigReport.com/eml.html> or just google Contact HaigReport.com/.

## How to fight cancer: continued from page 8

production of vitamin D. Google "vitamin D wellness", the best time is a simple 20 minute walk in the sun from times 6:00AM to 9:00AM and avoiding the midday UV damage. If you are going to do an examination or a job interview, you should always get some morning sun before attending. Also don't test for this if you are doing the "Take a teaspoon of bi-carb" test on the same week.

### 8. Good nutrition that provides the body's needs. That is based on how things work.

Good nutrition for the body does not mean lots of carbohydrates and sugars, it means protein, B group vitamins, minerals, anti-oxidants and the body's basic essentials. Research has shown that starving the cancers by denying them energy in the form of sugars and carbohydrates can extend life expectancy by up to 4 times. In some cases this can be the time necessary for the body to cure itself or for a cure to work.

The cell DNA is protected in the cell nucleus and exports RNA out of the nucleus and the RNA collects amino acids according to its coding. When the RNA is full of amino acids a process begins which strips the long chain of bonded amino

acids away which then folds into a protein molecule. The shape of this protein is determined by the order of the amino acids. Protein is like the steel cars are made of. Protein is the working structure of our bodies. People who do not eat enough protein are vulnerable to health issues caused by insufficient protein including torn muscles and tendons, poor general health and loss of function across the whole body.

Our bodies are not static but are dynamic. Bone work hardens and becomes brittle so our bodies are constantly removing old bone and replacing it with new bone. Every bit of RNA and Protein the cells make eventually has to be got rid of. Hair is protein and proteins can be very strong so energy is required to break down the old RNA and protein. There is a very large number of molecules called enzymes that do this job. These molecules are proteins with an organic mineral such as Zinc, Copper, molybdenum, potassium, calcium, magnesium and more. The molecules will hold the old rubbish proteins and vibrate till the energy is absorbed and the rubbish molecules breaks down. Like cities have a garbage collection systems our bodies have one too. These minerals come from vegetables. A lack of minerals can cause a build up of bits of

rubbish protein in the blood and some of these can result in blood clots causing thrombosis, strokes and heart attacks - the extreme price of not eating enough vegetables. One good source of minerals is molasses, the juice of sugar cane with most of the sugar removed. Brewers yeast is grown in diluted molasses and the yeast cell makes a large amount of vitamins including a full range of B Group vitamins. These vitamins act like enzymes and are necessary for many functions in our bodies.

Oxygen comes as O<sub>2</sub>, that is two oxygen atoms stuck together with two shared pairs of electrons. When oxygen is heated the O<sub>2</sub> falls apart into separate O's. These O's are called free radicals and burns what they come in contact with, releasing heat energy and often more free radicals. This process will cause damage to protein and RNA which is why the body has to remove the old damaged stuff. The body burns sugars and fats. Fats can burn without partially burnt fat being a problem. Some of the products of partially burnt sugars are toxic which is why sugar diabetes can result in clogged arteries leading to amputation. Toxic molecules alarm the immune system which produce sticky platelets to collect the harmful things,

but sticky platelets can stick to artery walls and stick fat molecules then that combination collects mineral precipitates that form in the blood and a white plaque builds and blocks the arteries. Anti-oxidants like vitamin C is burnt by these free radicals and every burnt bit is non toxic. by having lots of anti-oxidants in the body the rate of damage to RNA and protein is reduced.

Proteins connected to fat molecules make lipoproteins and these form cell membranes and many structures. The body makes a saturated high melting point fat from sugars and carbs and this leads to still cell membranes and stiff skin. By ensuring low melting point oils (fish, almond kernel and others), in our diet our skin will be more supple and we remain younger looking. Some low melting point oils are easily partially oxidised when heated and are, because of this oxidation, toxic. Vegetable oils like canola, sunflower oils are not a healthy cooking option. lard type oils that do not have double bonds in them are a better cooking option. Playing safe with food is using water to steam or boil only.

Eggs for breakfast, foods with vitamins and minerals such as Vegemite and vegetables. Some fruits for vitamin C and other

anti oxidants. The best diet has protein in abundance,

### Warnings.

Likewise with the treatments the right amount - an unknown for your situation is all that is necessary. Somehow you should navigate towards this amount. John Williams was cured with 4 feverfew pills a day spread out over the day.

I am not a doctor and no liability or professional advice is to be inferred from this email. I do not wish to be hunted down by the drugs industry that in Australia alone has let over 1,000,000 people die unnecessarily from cancer that fever few or other herbs could have saved to protect their profits. 2000 years ago the Chinese had a cure for malaria, it is wormwood. The research I have read indicates that there is a compound in worm wood that enhances the iron in hemoglobin as a catalysis causing burning in the malaria parasite's stomach killing it dead. This drug is so expensive there are still 400,000+ people dying of malaria each year when just chewing a wormwood leaf a day could save them. The monopoly of the drug cartel over the medical industry is killing people.

# FOR SALE: Standard Poodle pups

L to R, Fifi & Babe, the mothers, & Rusty the sire Some earlier pups now sold.

& another

Also shown are some of the earlier pups. The pups have been selectively bred for a happy and jovial nature. We have had many spontaneous reports from previous buyers of pups, in particular, from people who resell pups, that our pups have a marvellous temperament.

The price of the pups is \$2,000 for Males and \$2,500 for females. There are no pups available at present, but some will be available soon. As these pups are in great demand, order yours now.

If you are interested, please contact me on my PHP contact form at <http://HaigReport.com/eml.html> or just google Contact HaigReport.com/.

# How to fight cancer

Background. Some more pieces to the puzzle

My father died of cancer and before he died, I set out to understand cancer with the purpose of saving him. I was too late.

What I learned about cancer is it is a failure of our immune system to protect us from cancer. It has elements of genes increasing vulnerability to cancer and viruses damaging cellular dna increasing the cell's prospects of becoming cancerous.

Good nutrition can improve our immune system. Immune cells normally recognise cells that have gone bad and kill and eliminate them from our body. Cancer is a condition where the rate of spread of the bad cells is faster than the immune system can repair the damage by removing bad cells. The pustules of herpes, small pox and other such viruses are not caused by the viruses. They are caused by the immune system in it's battle against the virus by killing the infected cells and removing them. Inflammation in cancer is caused by the same process.

Steps:

1. Starve the cancer.
2. Increase the pH of the body.
3. Improve the immune system and general health.
4. reduce inflammation as this reduces the spread of the disease.
5. ingredients that stop or slow the cancer cells from multiplying.
6. ingredients that kill the cancer cells - like chemotherapy.
7. The body has to be able to remove dead cancers else they can rot and go gangrenous killing the person.
8. Good nutrition that provides the body's needs. That is based on how things work.

**1. Starve the cancer. Google "starve cancer".** Cancers are over active cells running at high energy levels increasing their populations at a fast rate. The metabolism of the cells requires energy and that energy comes in the form of sugars that come from foods digested in our stomachs. High energy cancer loving foods are

foods high in sugars and starches. Foods like sugar, noodles, rice, wheat based flours like bread, cakes and biscuits, white potatoes. Remove as much of these foods from your diet. No sugar, no cakes, no biscuits, no noodles, no bread, no corn etc.

**2. Increase the pH of the body. Google "cancer ph"** [https://www.google.com.au/?gfe\\_rd=cr&ei=6NXgVruBGNHN8gfJhbTADw&gws\\_rd=ssl#q=cancer+ph](https://www.google.com.au/?gfe_rd=cr&ei=6NXgVruBGNHN8gfJhbTADw&gws_rd=ssl#q=cancer+ph) Increasing the pH lowers the H+ and this increases the transport of carbon dioxide. When a fire is smothered the fire goes out, the getting rid of the by products of metabolism is very important and allows the system to function much better. I have read many times the statement that cancers thrive in acid environments. Increasing pH lowers the acid in the body and improves fitness and general body health. problems such as sensitive teeth, chronic fatigue, low energy, and other general un-wellness comes when our system becomes too acidic. Do the test. Take a teaspoon of bi-carb of soda with a magnesium pill available from any health shop or Woolworths and Coles. Wait 4 hours and then ask "do I feel much better". If the answer is yes then your system WAS too acidic and you should continue to take a magnesium with bi-carb of soda several times a day for about a week. Note you can purchase urine test strips which can measure urine ph and using this measure take bi-carb of soda with a magnesium as many times a day to keep your urine close to pH neutral (7).

**3. Improve the immune system and general health. Google "brewers yeast immune"** Feed your immune system, it is our army fighting most disease. The doctors examined the benefits of taking Epicor™ brewers yeast and found that it dramatically improves the immune system. Now they sell their brewers yeast as "Epicor" and hide the fact it is in fact common brewers yeast available from any health food shop. Take a table spoon of brewers yeast stirred into water or milk twice a day. Suggest you also get some sodium ascorbate from a health food shop and take a teaspoon in a very large glass of water. If you do not like brewers yeast take 2 to 4 teaspoons of Vegemite a day. Google "brewers yeast research" also look at [http://www.betterhealthinternational.com/lib\\_epicor.asp](http://www.betterhealthinternational.com/lib_epicor.asp) and

<http://www.vrp.com/epicor-500-mg-30-caps>

**4. Reduce inflammation as this reduces the spread of the disease. Google "cancer inflammation".**

The ulcer bacteria is known to cause cancer because its action of feeding off the stomach causes a constant open sore with inflammation. Untreated inflammation can result in cancer and speeds the spread of cancer. The foods we should avoid can be discovered by - Google "inflammatory foods". The foods we should increase - Google "anti-inflammatory foods". Flax seed oil is especially good at reducing diseases including auto immune diseases.

The immune system is like the Americans at war, there is friendly fire. Cells die in two ways, they commit suicide by enabling their suicide genes or they die and rot. Rotting cells alarms the immune system with the consequence that rotting cells are removed and other cells near by get damaged and die and rot and the inflammation and disease continues. Diseases such as autoimmune diseases are very vulnerable to this problem. When cells recognise they can no longer continue and commit suicide they normally produce a signal molecule telling the immune cells not to worry so much. Research I read indicated **Flax Seed Oil** available from Coles and Woolworths (do not cook or heat it) has a molecule in it essential for this constructing this signal molecule to calm the immune system. If you know anyone with arthritis they should try a table spoon of flax seed oil a day with the prospects of significant improvement. Not every one will benefit but many will.

**5. ingredients that stop or slow the cancer cells from multiplying. Google "cancer genes"**

Cancer is a disease of our genetic code. DNA has the capacity to multiply cells in our body. It is when it goes out of control that it becomes a tumor or cancer. For this process to occur many genes must function together. Block several genes and the cells may not be able to be cancerous. Take the block away and the cells will become cancerous again.

**5a Google "feverfew cancer"** In 2003 a friend's best mate (John Williams) after 3 chemotherapy treatments the last with stem cell replacement

had been told by the doctors they could not save him and sent him home to die. I bought a bottle of feverfew and gave it to my friend who gave it to his wife. The results of the next test was "you are cured - its a miracle". John survived another 12 years until an accident with a lawn mower and petrol caused him to become seriously burned in April 2015. Other friends of mine have also been cured with just fever few.

I read a research paper in 2003 and the drug that was developed from feverfew was trialled in Australia in 2015 but it is too expensive for the PBS. Feverfew blocks two genes essential for cancer. I cannot say it works for all cancers and the research paper suggested it should work for at least 50% of cancers. Take 2 to three teaspoons the first day and then one teaspoon a day and see how things improve for your next cancer test. Do not tell doctors because they will do every thing to talk you out of taking it. The drugs industry is a cartel taking money from people and any threat to their dominance is ruthlessly routed out.

**5b. Google "job's tears cancer treatment"** Also known as Chinese pearl barley and coix lacryma-jobi.

Apparently this is a crop that is a weed in rice fields but because it has a grain it has been tolerated. In some places in China it grows better than rice and where it is the staple Chinese Doctors never see cancers. **Google "kanглаite".** Kanглаite is an extract of job's tears and comes as a white milk. I have personally spoken to and been there when some patients, having imported kanглаite from China, were having it put into their blood stream by IV. One lady in her 50's explained to us she had had breast cancer then 5 years later had pain which was later diagnosed as bone cancer and after treatment was told the doctors could not save her. She told us that with this kanглаite her cancer count had been dropping every session and her pain had gone. The research paper I read indicated kanглаite blocked two cancer genes called COX1 and COX2. Having half a cup of Chinese pearl barley in your diet will be a definite help. Suggest soak for half a day, then blend in water to a milky liquid, then add to stew or with other cooking ingredients.

**6. ingredients that kill the cancer cells - like chemotherapy.**

**Google "apricot kernels" also Google "laetrile".** and Vitamin 17. Laetrile is an extract of Apricot kernels. I met two men both at an IV clinic in Camberwell Melbourne having hair tonic added to their IV drip going into their veins. They explained that the Customs had confiscated their laetrile so they had the supplier call it hair tonic to get it through Australian Customs. Both were regulars at this clinic. Both reported to me that their cancers were curing. One was still taking chemotherapy which he said had not working then secretly coming to this clinic to their laetrile IV. I have come across many others who have also claimed the benefits of apricot kernels. The drug industry employs people to put misinformation into the internet. I have read that one should not take more than 25 apricot kernels. This is a lie. In Europe Northern countries where apricots were a staple apricot kernels were also a staple in their meals and they ate it like people would eat any other vegetable or food. Preparation: Suggest use blender with small half cup of kernels and add olive oil then blend. Apricot kernels are very oily so blending in oil is very effective. Then use it like putting butter on other vegetables.

**7. The body has to be able to remove dead cancers else they can rot and go gangrenous killing the person anyway.** Like all things extremes are not necessarily safe. Exercise a conservative approach and use the doctors tests and your own knowledge of your body to guide your use of the cures identified above. For instance 5 heaped teaspoons a day of bi-carb of soda in a highly acidic 100kg man after two weeks will cause him severe headaches. Too many magnesium pills will loosen bowels sending you running to the toilet so take regular intervals and with lots of water. Too concentrated bi-carb soda or Sodum ascorbate will send you running to the toilet. It is alright to loose weight and save yourself but if you loose too much weight you are killing yourself anyway. It does not make sense.

**7a. Vitamin D's part in general wellness.**

If you are feeling generally mildly unwell – say like you have been drinking a bit too much alcohol the night before. Try going “out in the sun” to accelerate your body's
