Dear Janine

Mary and I were at the VC's Equity and Diversity Awards launch on Friday when we caught up with Douglas Porter who informs us that 2 medical opinions have been sought and Mr. Matthews is deemed to be calmer and more stable when he has his dog with him. So it looks like the University and therefore the Library has to allow him into our facilities with his dog unless he breaks the conditions. I asked what these were but I think is more a general statement from what I can gather. I have asked Douglas if the Library could have a copy of this letter.

Grace
